Skills

TypeScript	React	Solidity
Express	JavaScript	Node.js
Socket.io	Web3.js	Ethers.js
HTML/CSS	Tailwind	Ethereum
WAGMI	Viem	SubGraphs
Hardhat	Foundry	Next.js
PostgreSQL	Prisma	tRPC
TanStack	MongoDB	GIT
Blockchain	Zustand	Recoil
Redux	SQL	GraphQL
Strapi	Railway	Linux
AWS	Cloudflare	Serverless
Hono	Monorepo	Docker
CI/CD		

Languages

English and Hindi

Education

Bachelor's in Computer Science Engineering
UPES - Dehrad
2015 - 2019

Experience

Lead Developer
Nexon.xyz | *Dubai, Remote* — Jan 2025 - Present

Building a fully decentralized exchange (DEX) with spot and futures trading. Integrating lending/borrowing protocols, staking mechanisms, and modular vault systems for asset management and yield strategies.

Vice President of R&D
Poolz Finance | *Israel, Remote* — 2023 - Dec 2024

Redefined the whole smart contract architecture and spearheaded the development of a next-gen UI, admin panel, and fully automated previously manual processes, enhancing user experience and enabling the secure management of over $60M in transactions.

Team Lead
Poolz Finance | *Israel, Remote* — 2022 - 2023

Led a team of 4 developers to implement innovative features like on-chain token vesting and token stake vaults with cooldown periods. Built the admin panel to securely manage a flow of over $30M.

Full Stack and Blockchain Developer
Poolz Finance | *Israel, Remote* — 2021 - 2022

Joined as a Founding Member, developed the Web App and Smart Contracts from scratch, facilitating over $20M in investments across 50+ IDOs.

SAP Front-End Developer
Larsen & Toubro Infotech — 2019 - 2021

Built responsive SAP Fiori applications using SAPUI5, JavaScript, and OData services, optimizing UI performance and user workflows.

Solidity Developer Intern
Lambda Vision | *Paris, Remote* — 2018 - 2018

Successfully recovered over 10 ETH stuck due to a bug in a smart contract. Developed advanced access management contracts with automated, time-based permissions and robust security practices.

Projects

DaoSender
DaoSender.com | GitHub

The most gas-optimized solution for airdropping ERC20 tokens. Designed for efficiency, allowing users to upload unlimited recipient addresses and amounts, automatically calculating and selecting the most cost-effective way to execute transactions. Live on 8 chains

SubsCrypt
SubsCrypt.co | GitHub

A subscription management platform on Ethereum, revolutionizing how creators and subscribers interact. Think Patreon, but fully decentralized! Empowering creators to monetize their services with complete transparency and giving subscribers unmatched trust and security in every transaction.

Ethereum TicTacToe
EthTacToe.com | GitHub

A real-time multiplayer TicTacToe game where two players bet in ETH and the winner takes all. All moves are managed off-chain via MetaMask signatures, with final payouts executed on-chain for transparency.

Ethereum Housie
EthHousie.com | GitHub

A real-time multiplayer game inspired by Bingo. Each player pays ETH to purchase a ticket and select 15 random numbers (1-90). The server broadcasts random numbers one by one to the players. The first player to strike off all the numbers in their ticket wins all the ETH.
